

Quality Policy

We will ensure that our trailers and associated maintenance services meet our customer's expectations, our own high standards and comply with all relevant regulations.

Specific quality objectives will be set and reviewed through our management review process. To help achieve these, we will maintain a quality system that meets BS EN ISO 9001 - "Quality Management Systems – Requirements".

We must strive to continually improve our performance by regularly evaluating our products and services and identifying actions to ensure that our objectives are achieved and that problems are prevented.

P2 Policy

Environmental Policy

We are committed to the protection of the environment, including preventing pollution and complying with all relevant environmental legislation, regulations and other environmental requirements.

We will regularly evaluate the environmental impact of our activities, products and services and we will take action to continually improve our environmental performance by implementing an Environmental Management System that meets the requirements of ISO 14001.

It is our policy to:

- (a) Minimise the use of energy, water and natural resources
- (b) Minimise waste through prevention, re-use and recycling where possible
- (c) Dispose of waste safely and legally
- (d) Avoid the use of hazardous materials, where practical
- (e) Work with environmentally responsible suppliers
- (f) Prevent environmental damage and minimise nuisance factors such as noise and air pollution

We will define environmental objectives, targets and improvement actions that are related to this policy and to our significant environmental aspects. We will regularly evaluate progress against these through our 'Management Review' process.

We are committed to providing relevant environmental training and promoting environmental awareness to employees and, where appropriate, to suppliers and to communicating our environmental performance.

We will implement processes to prevent environmental nonconformities and to ensure that we are prepared to deal with potential environmental emergencies.

This policy will be regularly reviewed and updated to take account of organisational priorities and changes, environmental legislation and best practice.
